

# Vaulted — Hosted Virtual Server Solution V-HVSS

Did you know by participating in a virtual service solution you reduce your environmental carbon footprint which helps you achieve or improve your Green initiative?

## Reduce Datacenter Expense and Go Green

- Reduce capital expenditures and energy cost by consolidating hardware
- Reduce time to deploy applications and pay for only resources you use
- Reduce capital costs to scale quicker
- Use the latest version of Microsoft Software as a monthly subscription

## Security Assurance and Compliance

- Standardization of operating systems and software
- Take advantage of using industry best practices standards for patch deployment
- Security with virus protection, activity logging, event logs and auditing
- Manage patching and security updates
- National Record Center (NRC) Certified Vault

## Disaster Recovery Protection

- Controlled access and protected resources using KRM's vaulted virtual server
- Data can automatically replicate to additional KRM location
- Secure critical software and hardware
