

# Vaulted — Electronic Records Management System

## V-ERMS®

**Store and Access E-Records Online without high Capital Cost**

### Reduce Record Management Cost

- Anytime web access to electronic records and additional web part available for SharePoint
- Advance query and indexing options within highly customizable repositories
- Ability to add and index records by scanning or uploading through file shares directly through the web
- Pay for the number of users and space you need per month
- Automate e-mail archiving
- Supports the native viewing of more than 250 file types

### Enhanced Security and Compliance Features

- Enhanced user controls, version controls, auditing, logging, document associations, with optional 256-bit encryption in-state and when using the viewers
- Record retention policies and procedures that focus on retention and destruction of information
- Reliable and certified KRM technical staff providing various levels of support to free up clients IT resources
- Data stored in KRM vaults to increase physical protection of data
- Ability to apply locks and freeze to records for legal or tax purposes

### Simplify Disaster Recovery

- Data automatically replicates to an additional KRM vault
- Ability to customize SaaS solutions and implement on-premise if required
